Arch- (ātʃ, exc in *archangel*), *prefix*, repr Gr ἀρχι-, ἀρχ-, comb form of ἄρχων chief (cogn w ἄρχ-ειν to begin, take the lead), as in ἀρχι-διάκονος chief-minister, ἀρχι-ευνοῦχος chief-bishop, ἀρχ-άγγελος chief-angel. Hence in later L *archidiaconus archiepiscopus archangelus*, in OF *arce archediacne, arce-archevesque, arce-archangele* (In L the *ch* was treated as *c*, hence, in Romanic, it remained = *k* in *archangelus*, in other words, it became in It *arce-*, *arci-*, Pr, Sp, Pg *arce*, OF *arce-*, later *arche* whence G *erz*, Du *aarts*.)

In OE at first translated by *hēah-* high (*hēah-diacon, hēah biscop, hēah engel* etc), but also at length adopted from L as *arce-, arce-, erce-* (long *arce-*), in *erce-diacon erce-biscop, erce-stōl* arch see, *erce-hād* archiepiscopal dignity. The OE *erce-, arce-*, became in ME *erche-, arch-*, the latter coinciding with OF *arche-* whence also *archangel* was added. From these, in later times, *arch-* became a living formative, prefixable to any name of office. The same happened in med L and most mod langs, hence many of the Eng examples, e g *archduke*, are adaptations of foreign titles. Since the 16th c, *arch-* has been freely prefixed to names of agents and appellatives (like *arce* in Ital, and *archi-* in French, as *archifou, archipédant*) in a few instances also to appellations of things, and occasionally even to adjectives. Finally, from its faculty of being prefixed to any appellative, *arch* has gradually come to be a separate adjective, see prec word. (In modern literary words from Gr, the prefix is, in Eng, as in all the Romance langs, Archi- q v.) In pronunciation the compounds of *arch-* have two accents, either of which may be the stronger, according to emphasis, as in *right hand*. But established compounds, as *archangel, bishop, deacon, duke*, tend to have the main stress on *arch*, especially when they are prefixed to a name, as, the *Archduke Charles, Archbishop Cranmer*. As a prefix the usual sense is 'chief principal, high, leading, prime,' occasionally 'first in time, original, initial,' but in modern use it is chiefly prefixed intensively to words of bad or odious sense, as in *arch-traitor, arch-enemy, arch-rogue*.

[The origin of Shakspere's *aroynt* has been the subject of numerous conjectures, none of which can be said to have even a *prima facie* probability (Cf also Arunt) The following passages are usually cited as pointing to the same word

Ray *North Words* (1691) has *Rynt-ye*, by your leave, stand handsomely As '*Rynt you, watch*, quoth Bessie Locket to her mother' Proverb *Cheshire* Holme-by *Lett to Ray* 1703 (Worksh Words) has '*Ryndta*, used to cows to make them give way, and stand in their stalls or booyses

[In parts of Cheshire (and ? Lancashire) *ow* (au) is pronounced *i, ŷ* (ăi, i e ău) has been unilated to ău, and dialabialized to ăi, elsewhere it is reduced to ăə, ă, or ai, so that *round* becomes *rynd Rynd ta!* is thus merely a local pronunciation of round thee – move round move about! The local nature, the meaning and form of the phrase, seem all opposed to its identity with Shakspere's *Aroynt*]

-ary[1], *suffix* of adjs and sbs, ad. L. *-ārius*, *-ārium* The regular phonetic repr of these in OF was *-air*, but most of the words that actually lived on into OE had *-ier* (app by confusion with words in *-iarium* or *-ertum*, of which *-ier* was the regular repr), in AFr *-er*, instances of which still remain in Eng *primer*, *danger*, *antiphoner*, and names of trades and offices, like *carpenter*, *usher* (fr *huissier*, L *ostiarius*), while others, as *bursar*, *calendar*, *mortar*, *vicar*, have recently been refashioned with *ar* after Latin But in words of later learned adaptation in Fr, *-arius*, *um* were represented by *-aire*, in AFr and ME *-arie*, later *-arye*, now *-ary*, as L *contrārius*, Fr *contraire*, Eng *contrarie*, *contrarye*, now *contrary*, and this is the regular form in which L words in *-arius*, *-arium*, or their Fr representatives in *-aire* are now adapted in Eng, and on which new analogical formations are modelled More than 300 such exist in the language, comprising —

A *adjs* repr (or on analogy of) L *-arius* 'connected with, pertaining to', as *arbitrary*, *contrary*, *elementary*, *honorary*, *mercenary*, *necessary*, *primary*, *secondary*, *tertiary*, *voluntary*

B *sbs* **1** repr (or on analogy of) L *-arius* 'a man (or male) belonging to or engaged in', as *actuary*, *adversary*, *antiquary*, *apothecary*, *commentary* (liber), *February*, *January* (mensis), *lapidary*, *secretary*

2 repr (or on analogy of) L *-arium* 'a thing connected with or employed in, a place for', as *aviary*, *breviary*, *diary*, *dictionary*, *formulary*, *glossary*, *granary*, *ovary*, *piscary*, *reliquary*, *salary*, *sanctuary*, *vocabulary* See also -ARIUM

3 repr L (often mediæval) *-aria* (f *-aire*, *-arie*), forming fem sbs with same sense, as *Calvary*, *fritillary*

-ary[2], *suffix* of adjs, occasional ad L *-ārius* (stem *-āri*) 'of the kind of, belonging to' Of this the regular repr in mod Eng is -AR[1], q v But even in Latin several of these words had forms both in *-āris* and *-arius*, and in later Fr words of literary introduction, both these L endings are levelled under *-aire*, e g. L *contrārius*, *militāris*, Fr *contraire*, *militaire*. Hence, as Fr *-aire* from *-arius* gives *-ary* in Eng, Fr *aire* from *-āris* has occasionally also been adapted as *ary* instead of the more regular *-ar*, e g *capillary*, *exemplary*, *maxillary*, *military*, *salutary*

A *adj* Applied by some to the great division or family of languages, which includes Sanskrit, Zend, Persian, Greek, Latin, Celtic, Teutonic, and Slavonic, with their modern representatives, also called *Indo-European*, *Indo Germanic*, and sometimes *Japhetic*, by others restricted to the Asiatic portion of these *absol* The original Aryan or Arian language

The restricted use rests on the ground that only the ancient Indian and Iranian members of the family are known on historical evidence to have called themselves *Aria*, *Arya* or *Ariya* the wider application rests partly on the inference that the name probably belonged in pre historic times to the whole family, while this still constituted an ethnic and linguistic unity, and partly on the ground that even if it did not it is now the most convenient and least misleading name for the primitive type of speech from which all the languages above mentioned have sprung, inasmuch as *Indo Germanic* is too narrow, and *Indo European* too wide, for the facts, while *Japhetic* introduces speculations of which science has no cognizance A frequent use of the word, in which all agree, is to distinguish the *Aryan* from the *non Aryan* languages of India, the former being Aryan whether the term is used in the restricted or the wider sense

The prefixed *all*, though originally emphatic (= *altogether*, *quite*, *even*), soon lost its force, and *al-swa*, *al-so* came to imply no more than the simple *swá*, *sō* Hence, by 1200 (in the north) *alswa* had begun to appear in the subordinate clause likewise, '*alsua* brihht *alswa* gold,' a construction soon generally adopted though almost always with the relative in a phonetically weaker form than the antecedent, e g 'alswa briht *alse* gold, *also* briht *alse* gold, *alse* brigt *ase* gold, *als* bricht *as* gold,' but finally with both correlatives worn down, '*as* bright *as* gold' *Alse*, *ase*, *as* was even substituted as the relative, when the original *swá*, *so* remained as the antecedent, whence the mod 'not *so* bright *as* gold, OE ná *swá* beorht *swá* gold, 13th c southern Eng 'nowht *so* briht *sō* (*se*) gold,' and nowht *so* briht *alse* (*ase*) gold

B *sb*

1 A consonantal sound in which the action of the breath is prominently marked, one which is followed by or blended with the sound of H

(Modern phonologists generally apply the term to a consonantal diphthong consisting of a mute or stop followed by the slipping-out of an audible bit of *flatus* or aspiration, between the breach of mute-closure and the following sound (Whitney), which is believed to be the character of the Sanskrit 'aspirates, and to have been the *original* value of the Gr χ, θ, φ) But the term is also applied in Gr gram mar to the current *fricative* value of these letters, and in the Roman alphabet generally to any modification of sound indicated by the addition of *h*, e g to the Celtic *bh*, *mh* (= *v* and nasalized *v*), in Hebrew it has been given to the gutturals, and in other languages it has been used with similar generality

1727 *Sir* Chambers *Cycl* s.v., Some write the aspirates, or letters aspirated *Ibid* The eastern languages which do not express the vowels, do yet express the Aspirates. 1869 Mrs Himmelkennick *Time Beauty* III iii § 31 Guttur als, and rough aspirates, and strongly marked consonants are the most sudden and forcible inflections. 1879 Whitney *Sk Gram* 13 That the aspirates all of them, are real mutes or contact sounds, and not fricatives (like European *th*, *ph ch*, etc.) is beyond question

2 The simple sound of the letter H, or its equivalent the πνεῦμα δασυ, or *spiritus asper* (') of Greek grammar *Esp* applied to the initial *h* so often 'dropped, or improperly inserted, by the uneducated in England

1725 Pope *Pref Homer*, The feebler Æolic which often rejects its aspirate or takes off its accent 1872 Geo Eliot *Middlem* xxxv (1873) 196 A Middlemarch mercer of polite manners and superfluous aspirates 1877 *Punch* 18 Aug 65 Our old Cockney friend Arry who is weak in aspirates
